DETAILED ACTION

1. Claims 1, 2 and 4-7 are allowed. Claim 3 is cancelled.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Perry and Nathan Wallace on 12/31/2007.

3. The application has been amended as follows:

A. In the claims:

- a. Claims 1, 2 and 4-7 are allowed. Claim 3 is cancelled.
- b. Claim 1 (Currently amended) A network administration system for triggering commands in response to receipt of status logs generated by network devices and applications, comprising:

means for receiving said status logs and generating higher level logs in response to receipt of at least two different status logs which satisfy predetermined rule sets, wherein said higher level log provides a network level brief explanation of status indicated by said at least two different status logs satisfying said predetermined rule sets;

a user interface for programming execution sets of commands in association with predetermined ones of said higher level logs; and

program means for receiving said higher logs, parsing each of said predetermined ones of said higher level logs to determine their respective sources, and triggering execution of said commands in said execution sets in respect of each of said respective sources;

wherein said user interface and program means are implemented within one of said network devices.

c. Claim 4. (Currently amended) A method of triggering commands in response to receipt of status logs generated by network devices and applications comprising the steps of:

providing rule sets that are satisfied by receipt of particular combinations of at least two different status logs and when satisfied, result in the generation of higher level logs, wherein said higher level log provides a network level brief explanation of status indicated by said at least two different status logs satisfying said rule sets;

programming execution sets of said commands in association with predetermined ones of said higher level logs;

receiving said status logs and said higher level logs; and

parsing each of said predetermined ones of said higher level logs to determine their respective sources and triggering execution of said commands in said execution sets in respect of each of said respective sources.
